

PRODUCTS

TITLE: Setting the value of one Euro

AGE GROUP: 9-11 years old

DURATION: 2 h

LEARNING OUTCOME: Provide opportunities for learners to understand the nature, sources and uses of money.

KEY CONCEPTS: Euro, barter

MATERIALS NEEDED: Paper, notebook, colours and pens, coins

LESSON DESCRIPTION:

Introduce the lesson with a brainstorming activity so as to test students' understanding of the topics you will discuss about.

Have them watch the video "*La storia della moneta*" (The history of money) on YouTube in order to help them understand the main concepts in a funnier and more interactive way. After having watched the video, start a discussion and try to act as a facilitator intervening only to clarify, adjust and give more insights concerning the key concepts.

Divide pupils into groups of four or five. Distribute two informative handouts and two tables on Euro to fill out. At the end of the activity give each team one point for each correct answer. Afterwards have children play online games and keep giving them one point for each correct answer.

The team with the most points wins.

Moreover, have children watch and listen to "*Il gatto e volpe*", a song by the Italian songwriter E. Bennato and encourage them to memorise the lyrics so as to sing it together as a choir.

At the end, invite children to take their snacks and exchange them with those of their classmates so as to understand the value of things.
